INSTALLATION, MAINTENANCE, AND SPARE PARTS LIST

PRODUCT

Spectacle Blinds, Paddle Blinds, Spacer Rings, Bleed Rings and Orifice Plate.

This specification covers the recommended procedure for the installation and maintenance of Spectacle Blinds, Paddle Blinds, Spacer Rings, Bleed Rings and Orifice Plate.

INSTALLATION:

The installation of a Plate Product mentioned above is a simple process and requires a few tools. The flanges that the plate product is to be inserted between must have the space to spread open far enough to install the part, plus a gasket on each side of the plate product. (If RTJ you must have two oval ring gaskets.) Remove the existing bolts, spread the flanges, install the plate product along with a gasket per side, replace bolts and tighten to specified torques. Pressurize the line and inspect for leaks.

MAINTENANCE:

The only maintenance required, would be to coat the plate product with paint or rust inhibitor suitable for the atmospheric conditions where it is installed.

SPARE PARTS:

None Required.
